

## ENGINE EVALUATION:

In addition to the items listed in our annual planned maintenance inspection, complimentary services will include the following on diesel and gaseous fueled engines:

1. Record the date of the last service.
2. Check gas pressures.
3. Check all fluids.
4. Check the belt tension.
5. Adjust and grease the PTO.
6. Check turbo for wear and leaks.
7. Check water pump for wear and leaks.
8. Battery test to check charging and amp draw.
9. Check oil pressure and gauge for accuracy.
10. Check and measure exhaust temperature.
11. Check and measure turbo boost pressure.
12. Start unit and check for abnormal noises.
13. Run unit under load for 15-20 minutes to record data.
14. Note if the unit has any smoke and comment on amount and color.
15. Make final adjustments on the stop solenoid, aneroid, waste gate actuator, etc.

## SERVICE MATTERS:

Tradewinds has been providing service to customers in the Agriculture market since 1978. Fast and efficient service is a well-known Tradewinds Power Corp hallmark. All of our technicians are thoroughly trained professionals and our service trucks are continuously restocked with parts to ensure that each technician has everything they need upon arrival. We don't limit ourselves to just the popular brand products - we repair ALL makes and models.

# AGRICULTURAL PLANNED MAINTENANCE

## Protect Your Investment

### TRADEWINDS PLANNED MAINTENANCE:

Tradewinds Power Corp provides customized Planned Maintenance (PM) programs for each type of agricultural concern. Understanding freeze protection and ensuring that your equipment is operating as designed is critical. The middle of the night is not the time to find out your system has problems. Tradewinds Power Corp offers PM programs tailored to your needs.

### FACTORY CERTIFIED & TRAINED TECHNICIANS:

- 24/7 emergency service answered by an on call technician
- Scheduled inspections
- Extended service
- Extended warranty programs offered for new and used equipment
- Electrical systems testing
- Oil, antifreeze, and fuel lab analysis
- Wireless monitoring
- Fuel treating & polishing
- New equipment replacement

## Enhance the Life of Your Equipment

### TRADEWINDS SERVICE PROGRAMS INCLUDE:

- Regular scheduled visits
- Fluid and filter changes
- Environmentally safe waste disposal
- Complete system testing
- Optional oil analysis and fuel testing

A consistent planned maintenance schedule will uncover, diagnose, and correct minor problems before they become costly. While planned maintenance is not a problem-free guarantee, it is your best investment in the safe and reliable long term operation of your system.

## Minimize Downtime

### ANNUAL - PLANNED MAINTENANCE:

Tradewinds Power Corp inspects all equipment through our 82 point inspection procedure. We also:

- Change oil, oil filter, and fuel filter
- Test and treat coolant, as required
- Dispose of waste oil and filters at an EPA approved recycling facility
- Replace air filter, if needed (additional fee)

We will make repairs as needed once approved by the customer.

NOTE: Additional inspections do not include filter and fluid changes. Repairs are not included in the price of the maintenance programs. Repairs will be billed at our prevailing rates for parts and labor.

### THE TRADEWINDS POWER CORP ADVANTAGE:

- Cleanliness Guarantee - We will leave your site cleaner than when we arrived
- Premium Fluids - We use only the highest quality fluids
- Preferential Scheduling - Should a service emergency arise, your unit gets attention FAST
- Dedicated Representative - You have a dedicated inside rep to handle requests for information or service concerns
- Oil sample reporting where applicable
