Rating Definitions: Rated for 1800 rpm.

Standby ratings is applicable for supplying emergency power for the duration of the utility power outage. No overload capability is available for this rating. A standby rated engine should be sized for a maximum of an 80% average load factor and 200 hours of operation per year. This includes less than 25 hours per year at the Standby Power rating. Ratings are established based on 85°F (29°C) and an elevation of 1,000 feet (305 meters).

STANDARD FEATURES:

Tradewinds Power Corp (TPC) Diesel Hyundai powered mobile configured generator sets are self contained standby generator packages complete with mounted auto control panel, air cleaners, exhaust silencers, and other accessories mounted on a steel frame, with vertical radiator and exhaust discharge and oil & coolant drain Lines.
